Infrared Industries, Inc.
1817 Addison Way
Hayward, CA 94544

Dear Mark,

Your Model MDA-2000 NDIR Gas Analyzer Bench Assembly has passed the appropriate tests, Has had any previous conditions corrected, and meets the applicable requirements of the BAR-90 Specification. The MDA-2000 hereby receives a Provisional BAR Component Approval.

The Provisional BAR Component Approval is given to components of a Test Analyzer System that meet the requirements of the BAR-90 Specification applicable to the component. BAR only Provides full certification to complete systems; therefore, this approval signifies that the MDA-2000 bench assembly meets the minimum requirements for integration into a Test Analyzer System.

Should any problems arise with either analyzer in the future, Infrared Industries will be responsible For correcting the problem in a manner and a time frame satisfactory to the Bureau.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Robert M. Benjaminson', followed by a horizontal line.
